

# PROSUMER COMMUNITY OF INTEREST

PROSEU INCLUDED A COMMUNITY OF INTEREST CONSISTING OF OVER 50 PARTIES DEDICATED TO PUSHING PROSUMERISM AND THE CITIZEN-DRIVEN ENERGY TRANSITION FORWARD

**PROSEU**  
prosumers for the energy transition

## Energy Cooperatives

Includes energy communities producing, sharing and selling energy, but also communities just producing energy locally

## Non-profit organisations

Includes various types of organisations either supporting energy communities or looking into setting one up

## Municipalities

Includes medium-sized municipalities very active in climate policy, with specific targets for renewable energy or smaller municipalities very active on engaging citizens on energy topics

## Energy companies

Includes companies supplying renewable energy

## Others

Include interested parties, such as a full sustainable building complex and a coalition of organisation setting up a virtual power plant
