# POLICY RECOMMENDATIONS FOR STRENGHTENING PROSUMERS AND ENERGY COMMUNITIES
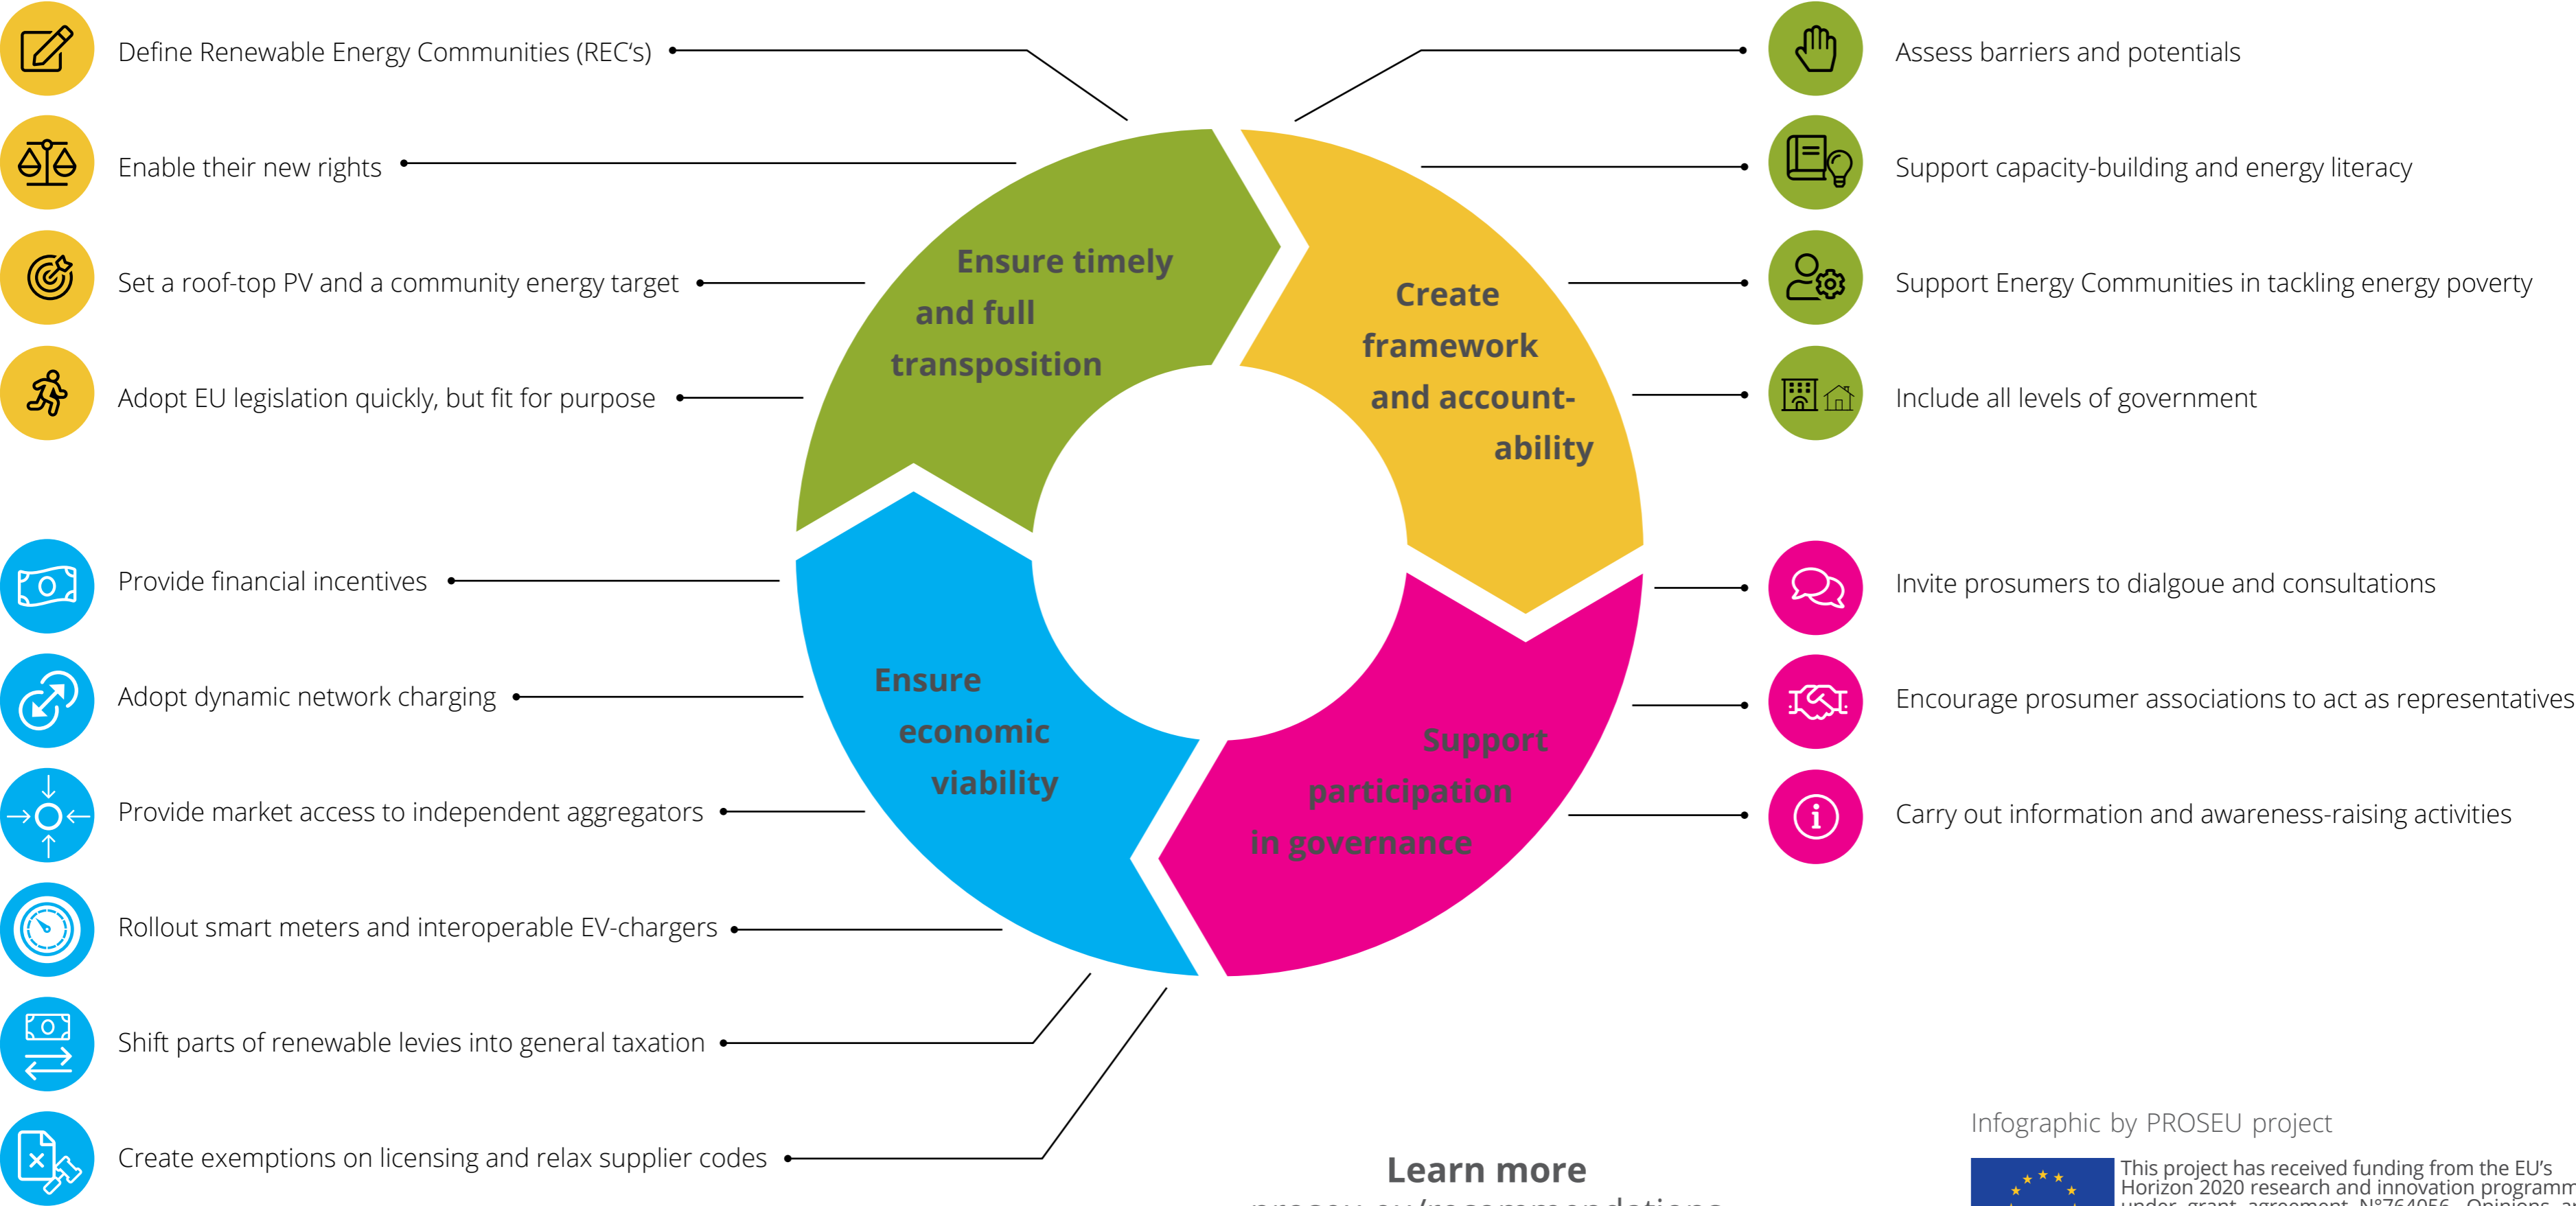

PROSEU
prosumers for the energy transition

Define Renewable Energy Communities (REC's)

Enable their new rights

Set a roof-top PV and a community energy target

Adopt EU legislation quickly, but fit for purpose

Provide financial incentives

Adopt dynamic network charging

Provide market access to independent aggregators

Rollout smart meters and interoperable EV-chargers

Shift parts of renewable levies into general taxation

Create exemptions on licensing and relax supplier codes

**Ensure timely and full transposition**

**Create framework and account-ability**

**Ensure economic viability**

**Support participation in governance**

Assess barriers and potentials

Support capacity-building and energy literacy

Support Energy Communities in tackling energy poverty

Include all levels of government

Invite prosumers to dialogue and consultations

Encourage prosumer associations to act as representatives

Carry out information and awareness-raising activities
