Buurtwarmte/district heating: a movement

- 150 heating initiatives (district heating, green gas, all electric)
- 10 initiatives who almost reach financial close
- 10 regional cooperatives

COLLECTIEVE WARMTE VOOR EN DOOR DE BUURT

PROFESSIONELE ONDERSTEUNINGS-
ORGANISATIE VOOR WARMTESCHAPPEN

Inclusiveness: including humanity

more than consumer and producer

We are community,
We are people,
We have fun,
We fight,
We are proud,
We learn together,
We help each other
We organize our energy
We are the new commons

Beyond state and market

EEN NIEUW SAMENSPEL

The « Clean Energy Package is about RIGHTS!

1. Recast of the Renewable Energy Directive (RED II)

- Renewables self-consumer
- Renewable energy communities

2. Recast of the Electricity Market Directive (EMD)

- Active consumer
- Citizens energy communities

3. Governance Regulation

- National Energy Action Plans (NECPs)

Citizens have now
the right to

- generate,
- self-consume
- store and
- sell renewable energy,

and to participate in
energy communities

Warmteschap: Heating energy community

New kid on the block, first in Europe

Heating system

Entire system or parts

Local ownership:

Rooted in the area, say and financial ownership

Social rules/ commoning:

Democratic, profit for purpose, working on the human scale

Warmtewet 2.0 – new concept heating law

Klimaatdoelstellingen

Besluitvorming en investeringen collectieve warmte mogelijk maken

Regulerend kader op orde (publieke belangen)

Vertrouwen in collectieve warmtelevering laten groeien

Doel

Marktordening

- Distributiesystemen
 - ⑩ Gemeentelijke regierol
 - ⑩ Vaststellen warmtekavel
 - ⑩ Aanwijzen warmtebedrijf
 - ⑩ Ondersteuning Rijk/Provincie
- Transportnetten
 - ⑩ warmtetransportbeheerder

Tariefregulering

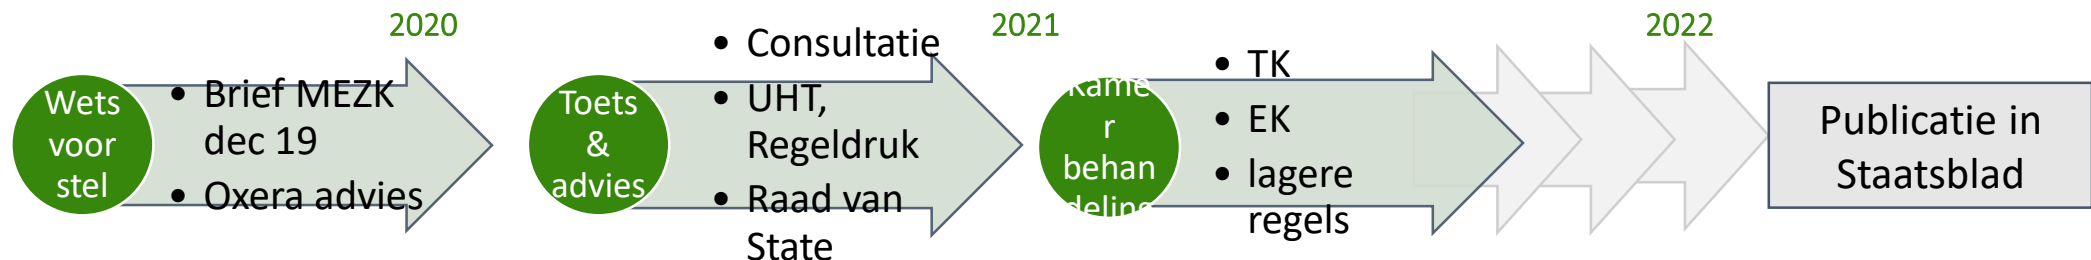

- Alternatief voor gasreferentie
- Meer kosten gebaseerd
- Boekhoudkundige regels (RAR)
- Redelijke overgangperiode

Verduurzaming

- Minimum pad CO₂-reductie 2050
- Verplicht verduurzamingsplan
- Ophaalrecht restwarmte
- CO₂-prestatie op nota consument

Leveringszekerheid

Planning

Warmtewet/ heating law 2.0 CONCEPT

Lots and lots of problems.

Aim is biggest possible areas for business development:

Scale and market orientated

No mention of energy directives and no position for “Warmteschap”, or coops. Little possibility for a just and inclusive transition.

Questions

An inclusive and just transition is so much more than participation.

- Which language do we need, to go beyond state and market?
- How can we include humanity in our projects?
- How can we claim our own position in policy and law?

Thank you!
